

StartMenu Cleaner v1.11

L5 Software Group, LLC

System Requirements

StartMenu Cleaner is designed to run on the following x86 platforms:

- Windows 98 Second Edition
- Windows Millennium
- Windows NT 4 with Service Pack 6a and Internet Explorer 4.01 Service Pack 2 (workstation and server)
- Windows 2000, Windows 2000 Server, Windows Advanced Server
- Windows XP Home, Windows XP Pro

Purpose

StartMenu Cleaner is a tool designed to allow users to identify dead links in their start menu and remove them. Under Windows 98SE and Windows Millennium, the user is able to see the files in the start menu folder (which is shared by all users). In Windows NT, 2000 and XP, the user can choose to scan for dead links in the "All Users" start menu or simply in their "Current User" start menu. After scanning for dead links, the user is presented with a list of dead links that were found (if no links appear in the list, no dead links were found). By highlighting a specific link and clicking the button "Link Properties" (or simply by double-clicking on a link), a properties dialog is shown giving more information about the link.

It is up to the user to understand the ramifications of their actions when using StartMenu Cleaner. Modifying or removing a service may lead to a machine being unable to boot or run properly. The L5 Software Group bears no responsibility for problems resulting from the misuse of this software.

Installation

To install StartMenu Cleaner, simply double-click on the install package and follow the instructions presented.

StartMenu Cleaner is Shareware

The StartMenu Cleaner application is shareware. This means that the software is completely functional without registering. The only difference is "nag" splash screen. If you find StartMenu Cleaner useful, please register your copy by clicking the link in the splash dialog or the about dialog, or by going to our website: <http://www.L5sg.com>. In addition to this application, we have other free and shareware applications in which you may have an interest.
